Research Report on Computer Components Sign-Up Sheet

Computers have many components that make it up. Understanding of these components in what they are used for and how they work is an important aspect to future designs, builds, maintenance, and troubleshooting. For this project, students will select a related component and come up with **4 related topics including hardware components, operation, how it works, and variations. Format is to include a title, overview, 4 topics, summary, and resource section** to complete the report on the related computer component.

#	Student Name(s)	Computer Component Selection	Computer Related Components
1			ATX case
2			Power Supply
3			CPU
4			Motherboard
5			RAM Memory
6			Graphics video card
7			Cooling air/liquid
8			Sound card
9			Solid State Drive
10			Optical drive
11			Hard drive
12			Speakers/headphones
13			Monitor(s)
14			Keyboard
15			Mouse
16			optical drive
17			Surge Protector & UPS
18			Network Interface Card
19			Router
20			Cable Modem
21			Printer
22			Scanner
23			Webcam
