

Research Report on a Computer/Robotics Related Career

Taking a course in Computer Technology and Robotics is a great way to sample what you may experience in the field. Because this is a course, learning new knowledge, skills, and attitudes may not be easy and limit your full effect in comparison to the real thing. Part of this course is learning about computer and robotic related careers. This assignment is designed to allow you to pick a related career, that you may be interested in and research it, to find out what it is all about and share with the rest of the class.

Each student is to pick a career field, and sign-up with the instructor as only one of each career is allowed, so don't take too long to decide as someone else might want to do the same career and once it has been selected and signed up with, you will have to select another. Not to worry, there are many Computer Technology related career fields out there to choose from and all will be sharing their information on the public Wiki you have access to on Mr. Franzen's web site.

Your researched career field will require you to look up some common areas of information which will help all decide if it is something you are interested in along with all the details. The following * key information is to be included in your one-to-two-page (maximum) career report in no particular order:

- Job title, general description, responsibilities, and salary/wages
- Related skills, interests and values
- Schooling, preparation and requirements
- Future forecast/outlook of field area
- Your resources and where to go for further support

There are several resources on Mr. Franzen's site including a sample specific to this research assignment, so make sure you check it out. You may also use Prezi, Slide Share, Mind Map or similar online presentation tools, allowing you to link to wiki with each page expanding on above points.

Evaluation

Once done, give yourself a mark and have a partner review and peer mark your report and enter marks in table below.

Evaluation Table for Research Report on a Construction Related Career						
#	Category	Description	Mark	Self-Evaluation Mark	Peer-Evaluation Marker name_____	Teacher Mark
1	Content	* key information (above) is all there	10			
2	Easy to Read	Information is clearly laid out	2			
3	Visual	Report visually appealing	2			
4	Research	Depth and amount of information found	4
