

SAFETY IN THE WOODWORKING SHOP

- ❶ Woodworking is an *inherently dangerous* activity.
- ❷ Most woodworking accidents *are preventable*.
- ❸ **Rules and instructions** concerning machinery and tools **must be followed** in order to prevent accidents.
- ❹ Accidents are caused by **three** factors:
 1. Reckless behaviour
 2. Rushing through procedures
 3. Fatigue
- ❺ Most woodworking injuries **are not 100% repairable** and they all stay with you for the rest of your life.
- ❻ **Safe conduct** in the woodshop is the key to building new skills and enjoying your work.
